Journal of Clean Energy Technologies

CONTENTS

Volume 1, Number 2, April 2013

A Study on the Synchronization Characteristics of Thermoacoustic Laser...........................................75
  Sung Seek Park, Seung Jin Oh, Won Gee Chun, Kuan Chen, and Nam Jin Kim

Thermochemical Conversion of Waste Papers to Fuel Gas in a Microwave Plasma Reactor.......................80
  Parin Khongkrapan, Nakorn Tippayawong, and Tanongkiat Kiatsiriroat

Influence of Organic Loading Rates on Aerobic Granulation Process for the Treatment of Wastewater..........84
  B. K. Bindhu and G. Madhu

An Investigation of Cooling and Heating Degree-Hours in Thailand......................................................87
  Kriengkrai Assawamartbunlue

Technology Needs Assessment for Climate Change in Energy Management Sector: The Case of Thailand.....91
  Wongkot Wongsapai

Financial, Environmental and Energy Analysis of Various Micro-CHP Systems within the UK Domestic Market...............................................................96
  T. S. Doyle, Z. Dehouche, A. Harries, and I. Rizos

Regional Energy Integration – A System Modeling Approach.................................................................101
  Hosam E. Emara-Shabaik, Gulnur Kalimuldina, and Sarim Al-Zubaidy

Non-Thermal Plasma Reactor for Decomposition of Propane to Generate COx Free Hydrogen................105
  I. Aleknaviciute, T. G. Karayiannis, M. W. Collins, and C. Xanthos

Growth Performance of Microalgae Exposed to CO2.............................................................................110
  Alessandro Minillo, Hania Cardamoni Godoy, and Gustavo Graciano Fonseca

Photocatalytic Decomposition of Indoor Air Pollution Using Dye-Sensitized TiO2 Induced by Anthocyanin and Ru Complexes.................................................................115
  Chiu-Hsuan Lee, Je-Lueng Shie, Ching-Yi Tsai, Yong-Ting Yang, and Ching-Yuan Chang

Disinfection By-Products Removal by Nanoparticles Sintered in Zeolite.................................................120
  Kubra Ulucan, Cansu Noberi, Tamer Coskun, Cem Bulent Ustundag, Eyup Debik, and Cengiz Kaya

Effect of Ozonation on Anaerobic Organic Removal from Membrane Concentrate...............................124
  F. Büşra Yaman, Mehmet Çakmakci, Bestamin Özkaya, Doğan Karadağ, Billur Dora, and Vesile Çelebi

Nonlinear Modeling and Simulation of a Four-phase Switched Reluctance Generator for Wind Energy Applications.................................................................127
  F. Messai, M. Makhlouf, A. Messai, K. Nabti, and H. Benalla

Progress of Resources and Environmental Carrying Capacity.............................................................132
  Y. N. Tian and H. Q. Wang

A Primary Master Plan of Gardens’ City- A New City in Egyptian Western Desert (EGCWD).................136
